

**Conference- & Informationsys. 5
GuidePort Receiver**
**GP EK
3000-0-1**
Cat. No. 05236
Description

The digital GuidePort GP EK 3000-0-1 RF diversity receiver supplies the visitors of a theme park or an exhibition with audio information. The audio programme to be received and the volume can be selected via the receiver's membrane keys. With the Stop and Repeat keys the visitor can stop the information on an exhibit or have the text repeated. If required, the audio information – which usually starts automatically – can also be triggered manually via the receiver keys.
