

Conference- & Informationssysteme 5 Conference Terminal

SDC 3000 D

Cat. No. 04866

Description

The SDC 3000 D is an extremely easy-to-use conference terminal. It features a built-in loudspeaker and electret microphone, ensuring excellent sound reproduction throughout the entire conference room. The unit is controlled via the MIC key. By pressing this key, for example, the participant can activate the microphone or "apply" to take the floor. A red LED ring on the microphone indicates who is allowed to take the floor or who has applied for a comment. In Voting Mode, the unit's three keys are assigned yes/no/abstention.

A simple change in configuration at the SDC CU central unit is all that is needed to turn the delegate unit into a chairperson unit. Two control keys which are otherwise inactive will be assigned special functions.

Features

- Conference terminal with built-in electret microphone and loudspeaker
- Gooseneck microphone with LED ring
- Microphone key with LED
- Terminal can be used as a delegate unit or – by altering the configuration – as a chairperson unit
- Voting function (yes/no/abstention)
- Headphone output (fixed volume)
